KSS COMBICOATER OF JWS, GERMANY

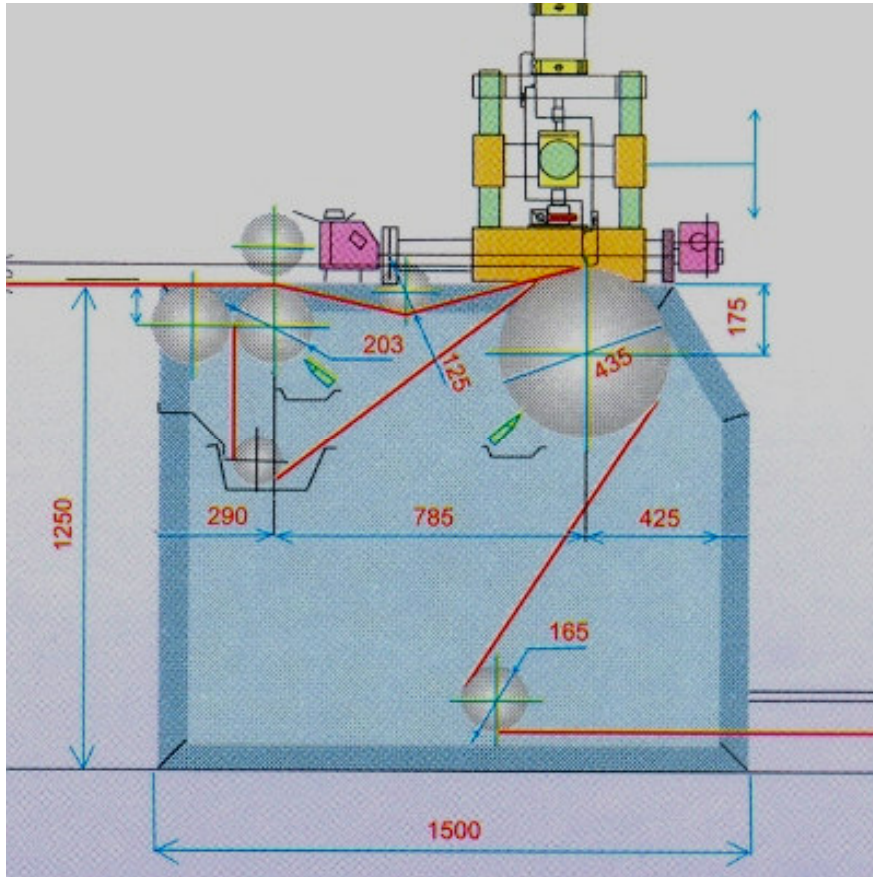

Salient Features of KSS Combicoater of JWS, Germany

- Combicoater is with knife-over-roll and knife-on-air coating systems.
- An even paste feeding in front of the coating knife is made possible by a traversing feed pipe mechanism.
- During knife-on-air coatings, a web tension control device provides a constant web tension to give proper base conditions for 'premium coating'.
- Combicoater can handle various chemicals in both paste and foamed conditions.
- Machine is useful for home, fashion and industrial textiles as well as for nonwovens

COATING LINE OF YAMUNA, INDIA

Salient Features of Coating Line of Yamuna, India

- Knife-over roller system.
- Unit is quite stable for coating of fabrics in a wide range of coating weights using PVC paste and PU solution.
- 'Microga' adjustment for absolute uniform coating.
- Quick pneumatic lifting for joints.
- Side checks for lateral limiting of paste.
